Oklahoma City, OK 73170

RE: Reference Letter

Mr. Curtis,

Rican Industrial Maintenance Solutions Inc. primarily operates in the maintenance and rebuilding of cooling towers in the south eastern United states. We have utilized both the Variable Flow and Spin Free nozzles from Global Opportunities ,Inc.

Over the years we have put hundreds of nozzles into service and have not experienced any failures. The improved thermal performance is excellent and the great turndown is not obtainable with any other nozzle on the market. We have no doubt increased our business in part because of the suburb performance of your nozzles.

We will continue to utilize your nozzles and appreciate the good service provided.

Richard Harding

Director Sale, Service and Repair

Rican Industrial Maintenance Solutions Inc.
