RE: *Rotary Spray Nozzle*™ and *SpinFree*™ nozzle

Dear Mr. Curtis:

You know that Tower Tech is the manufacturer of the world's largest fleet of rental cooling towers and the builder of the world's most energy efficient and environmentally sustainable cooling towers.

We have used your Rotary Spray Nozzle in cooling towers offered for sale to customers since 1992, and we have used your SpinFree nozzle in our fleet of rental cooling towers since 2006. The superior thermal performance of our towers, which is certified by the Cooling Technology Institute (CTI), is owed in large measure to the capabilities of your unique and advanced nozzle designs. In fact, the excellent turndown performance of our towers when operated in variable-flow conditions is not possible with any other nozzles.

We look forward to our continued use of your nozzles and to continuing our great working relationship with you.

Most sincerely,
